BOSCH

Invented for life

Who are Bosch?

“I have always acted according to the principle that it is better to lose money than trust. The integrity of my promises, the belief in the value of my products and in my word of honour have always had a higher priority to me than a transitory profit.”

Robert Bosch, 1921

For over 125 years, the Bosch name has been synonymous with engineering excellence. Our home appliances are renowned for their quality, reliability and performance which derives from our inherent, unflagging commitment and the painstaking thoroughness with which every unit is made. As you would expect from German engineering, there are no gimmicks or frills with our products – just pure, clean lines and beautiful, functional simplicity that will enhance any kitchen.

The values that shaped Robert Bosch’s vision for his new company in 1886 are the same principles that guide the business today; never lose the trust of your customers, look after your staff and partners and change things for the better. It’s what has kept Bosch at the forefront of the home appliance industry and what will keep it there in the future.

Looking for help? You'll find it here.

For help with your home appliance,
trust Bosch Customer Service.

Arrange an engineer visit.

Our appliances are manufactured to the highest standards, but if you do need a visit from an engineer we are here to help. We have teams of locally based engineers around the country – employed and trained by Bosch*. This gives them unrivalled expertise and knowledge of our appliances. We repair appliances both in and out of guarantee. All repairs are analysed in advance by a technical team so that the parts likely to be needed to complete the repair are sent to the engineer's van the night before the visit.

To arrange an engineer visit to your home please call:

0344 892 8979

Lines are open 24 hours.

Calls are charged at the basic rate, please check with your telephone service provider for exact charges.

You can also arrange an engineer visit online: **bosch-home.co.uk/bookonline**

Product advice.

If you need help using programmes or features, or need assistance selecting a new Bosch appliance from our current range, our product advice team can help.

You can call us on

0344 892 8979

or visit: **bosch-home.co.uk**
for frequently asked questions and helpful videos.

Register my appliance

We advise that you register your appliances so that we can contact you about any product updates. Visit registermyappliance.org.uk for more information.

You can also call Bosch directly to register your appliance on 0344 892 8979 (option 5). Please call us within 28 days of purchase to discuss the full range of options for extending your warranty.

Visit the Bosch online store.

Find a comprehensive selection of accessories to help you get the most out of your appliance, along with our full range of replacement spare parts and cleaning & care products at the Bosch online store.

You can also purchase Tassimo hot drinks machines, vacuum cleaners, irons, steam stations, kettles, toasters and food preparation appliances directly from us online.

You can call us on

0344 892 8979

or visit: **bosch-home.co.uk/store**

Accessories.

Many appliances can be enhanced with optional extras, such as telescopic rails for ovens or special cookware for hobs.

When buying a Bosch home appliance, you know you are purchasing a quality, reliable product. However many appliances are used daily, so need cleaning and maintaining to keep them looking great and operating at peak performance.

Every one of our cleaning and care products has been thoroughly tested and approved for safe and effective use on your Bosch home appliance.

Replacement spare parts.

We keep in stock a comprehensive range of replacement spare parts for our appliances for up to ten years. All our parts are original spare parts, not copies.

Award-winning service.

Bosch Home Appliances Service was proud to win the Domestic & General Total Excellence & Quality Award for 2016. The award is decided from surveys sent to customers and 94.1% described our service as excellent or good.

Your home is in safe hands. Yours.

Whether you've left the oven on, or want to save energy while you're on holiday, Bosch appliances with Home Connect and Nest give you control wherever you are.

Welcome to your new digital home.

Remote control takes on a new meaning with Home Connect. You'll be able to connect to a number of your home appliances with your smart device while you're out. That means you'll be able to control your dishwasher easily and monitor its progress through the cycle. And whether you're at home or not, the handy app will let you know the most suitable programme for your dishes.

You'll also be able to use your mobile device to turn on your oven remotely so dinner's ready when you get home. And Home Connect's clever technology even lets you remotely programme your coffee maker to make you and your friends' favourite drinks.

An ingenious partnership.

With Home Connect and Nest, you'll always be in full control. With instant notifications and the ability to react quickly, Nest's smart devices will keep you updated when you're out. When life's so busy, you can relax knowing that Home Connect and Nest are looking after your home.

To use your home appliances from Bosch with Home Connect capability, you need a smartphone or tablet with Wi-Fi.

Look out for our Home Connect models.

Home Connect is a service offered by Home Connect GmbH.
For more information on Home Connect please visit www.bosch-home.co.uk

Bosch built-in cooking makes perfect sense.

Intuitive sensor technology in our cooking appliances takes care of everything in the kitchen, whether you're frying, boiling or baking. These advanced cooking features give you PerfectControl over your dishes and help you achieve perfect results every time.

PerfectAir

PerfectAir is our advanced feature that clears the air without you having to do anything. A sensor constantly detects the levels of odours in the air and adjusts the power level – from light use to intensive – to ensure your kitchen air is always clean and fresh.

BoschAssist

Discover our sensor-controlled functions with BoschAssist; PerfectBake and PerfectRoast. This feature automatically sets precise information on temperatures and cooking times for all kinds of dishes, plus you can simply scroll through to find our intuitive baking and roasting functions.

PerfectFry

Whether you like it rare or well done, our FryingSensor knows how to cook your steak just the way you like it. By measuring the temperature inside your frying pan rather than at the hob, you'll have full control making frying easy and stress-free.

PerfectCook

Your pasta will never boil over again. Our hobs are designed with a sensor which can be attached to your pan, so you'll be able to control your cooking by its temperature rather than the power level. So whether you're defrosting, warming up, cooking or deep fat frying, you're in control with our smart CookingSensor. Because precise temperature control guarantees perfect cooking results.

Models shown for illustrative purposes only.

Introducing the Bosch oven range.

Whatever kind of cook you are, we have a range of smart and stylish built-in single or double ovens for you to choose from. Serve up vitamin-packed meals using one of our innovative steam ovens or, if limited on space, our easy to use microwaves and compact appliances will bring style and function to any kitchen.

Serie 8 +++

With their impressive technology, elegant design and crystal clear TFT-touch display, our **Serie 8** ovens meet every need and more in the kitchen. The innovative control wheel provides convenience and functionality with full control over your dishes at all times. Plus, thanks to sensor-controlled programmes, you'll achieve perfect results every time.

Serie 4 +

Modern design, quality engineering and practicality. Our **Serie 4** compact microwave ovens look stunning inside and out. Microwave technology makes it easier for you and the family to cook.

Serie 6 ++

Simple elegance meets superior technology. **Serie 6** ovens give you more than just convenient operation and maximum energy efficiency. Modern functionality means your oven is easy to use with various programmes to suit different foods, all available to view clearly on the large LED display.

Serie 2

Our **Serie 2** oven offers you classic design with easy operation. This is the optimal solution for anyone who wants a reliable appliance with good value for money.

Model shown: HRG6769S6B

Whichever model you choose from our Serie ranges, you'll find lots of reasons to love your Bosch oven.

Combination design.

Using the highest quality stainless steel and glass, our ovens and compact appliances combine beautifully to deliver a timeless, elegant and stylish finish to any kitchen with sleek, co-ordinated lines and matching panels.

Combination possibilities.

Create seamless lines in your kitchen with our Serie 8 range by combining a single oven together with one of our compact appliances and warming drawers. For the optimum in design co-ordination, choose appliances belonging to the same Serie 8 family to create seamless lines in your kitchen.

Energy efficient.

Everything we know about energy-saving, green technology has been integrated into our range of feature-rich, built-in ovens.

Perfectly even results, every time.

Truly perfect baking and roasting requires not only the ideal temperature, but also the appropriate heating mode. From 4D HotAir to Hotair Eco, our ovens offer up to 15 different heating functions that deliver great results, whatever the dish.

Cooking functions explained.

4D HotAir

Place your food on any of the four shelf levels to achieve consistently perfect results: thanks to the new fan wheel that changes the direction of rotation during operation to distribute heat evenly on every level.

3D HotAir

By maintaining the right temperature across all three shelf levels, consistently even cooking results are achieved.

Top and bottom heat

Conventional baking and roasting on one level.

Hotair grilling

By operating alternatively, the grill and fan create a rotisserie effect, perfect for creating crisp meats and poultry, while using up to 50% less energy than traditional roasting.

Bottom heat

Only the bottom element is heated – ideal for pastry cases, bain-marie cooking and reheating.

Pizza setting

Get an authentic pizza – crisp base and moist topping. Also great for quiches, tarts and frozen foods.

Hotair Eco

For all those times you cook using just one shelf level, Hotair Eco gives perfect results and uses up to 30% less energy than standard Hotair.

Full width variable grill

Grill large quantities with ease thanks to the precise temperature control. For added efficiency the door can be closed and the smells are kept in the oven.

Defrost

Gently defrosts food evenly and in half the time it would take on the kitchen counter. Twice as quickly as it would on the kitchen counter.

Fast heat

For those times when you need your food ready more quickly, select fast heat to heat the oven approx. 30% faster.

Making **life easy** through innovative technologies

Perfect results every day of the week.

You get perfectly controlled baking and roasting at the touch of a button with BoschAssist on Serie 8 ovens. Its helpful technology makes it easy to produce delicious meals every day of the week.

Model shown: HRG6769S6B

Put a new spin on your cooking.

You'll always have a complete overview and full control of all your oven's functions. The intuitive control wheel and full-width, high-resolution clear-text **TFT-touch display** with **DirectSelect TouchControl** buttons make operating our ovens a breeze. Clear, vivid images and helpful prompts guide you through each step as you navigate through the various programme options.

Even heat. Maximum flexibility.

Thanks to **4D HotAir**, you can place your food on any of the four shelf levels and the results will be consistently perfect. Our new motor and fan wheel design makes it possible: it changes the direction of rotation during operation to distribute heat evenly on every level. And that's not all: with **4D HotAir**, you can also bake and roast on up to four different levels simultaneously. So you'll enjoy reliable results from top to bottom.

Perfect results at your fingertips.

Discover our sensor-controlled functions with **BoschAssist**, **PerfectBake** and **PerfectRoast**. This feature automatically sets precise information on temperatures and cooking times for all kinds of dishes, plus you can simply scroll through to find our intuitive baking and roasting functions.

AutoCook automatic programmes are a feature on selected ovens that work out the time, temperature and shelf position for you.

Scroll through for the PerfectBake.

Baking has never been easier. The **PerfectBake sensor** offers precise sensitivity and constantly measures the moisture level of dishes, as well as automatically regulating the baking process.

Scroll through for the PerfectRoast.

Traditional British beef, Easter lamb or Sunday roast chicken – with the **PerfectRoast meat probe**, perfect results are guaranteed every time. With three temperature sensors for even more accuracy, the meat probe measures the core temperature of the food – removing the guesswork. Just like a professional chef, but with complete ease. Three highly sensitive measuring points determine the core temperature of your food to the exact degree, guaranteeing perfect roasting results and taking away the guesswork.

Full steam ahead – for full taste.

The Serie 8 single oven HRG6769S6B combines the best of a steamer with the benefits of a classic oven. Equipped with the **added steam function**, this oven produces succulent roasts, with juicy meats and crispy skins, as well as breads with the perfect colour and crust. Full steam option is available in our compact ovens range.

Cleaning made easy.

The ultimate in self cleaning power. **Pyrolytic self-cleaning** heats the oven to around 480°C, which reduces dirt and grease deposits to dust that can be easily wiped away.

Fits every kitchen. And every need.

Our range of Serie 8 compact appliances are the stand-out choice. Not just because of their superior performance and convenience, but also because their sophisticated design extends down to the smallest detail. They combine beautifully to deliver a timeless finish to any kitchen. Whether your preference is for a steam oven or a microwave, our compact ovens are designed so that you can team them up with other Serie 8 compact appliances, warming drawers, and Serie 8 single ovens. They all fit together in complete harmony.

Introducing the Bosch electric hob range.

As you would expect from Bosch, all our electric hobs are made using high quality materials, are easy to use and add contemporary elegance to any kitchen. To help you choose the right electric hob for your home we have divided them into the three ranges below.

Whichever model you choose from our Serie ranges, you'll find lots of reasons to love your Bosch electric hob.

Twice as fast as gas.

Induction hobs can heat food and boil water nearly twice as fast as gas and three times faster than ceramic hobs*. And as they're also more energy efficient, you'll save money as well as time.

Cooking that's designed around you.

Ultimate flexibility with FlexInduction. One, two or three pots, or even a large casserole: the Bosch FlexInduction hob leaves it up to you. At the flick of a switch, you can combine two induction zones into a large induction surface on which you can cook the way you want.

*Based on time required to heat 2 litres of water at 15°C to 90°C using Bosch hobs. In accordance with EN 50304/ EN 60350: 2009.

Serie 8 +++

Our **Serie 8** range of electric hobs combines convenience and elegant design, allowing you to select individual cooking zones and power levels. All controlled at just the touch of a button with the modern touch control.

Serie 6 ++

Expect excellent operation and timeless designs with our **Serie 6** range of hobs. You'll get premium engineering and materials so that you can always cook something a little bit special. Get ultimate control with the easy to use DirectSelect touch control.

Serie 4 +

Featuring a range of **Serie 4** electric hobs that are convenient and simple to operate, our essential range maintains classic design with contemporary style.

Models shown: Hob PXY875KW1E, Hood DWF97RV60B

Hobs that deliver perfect results – intuitively.

When it comes to cooking on the hob, it doesn't take much for things to go wrong. That's why we've designed hobs that know exactly what you want to do so you'll achieve the perfect results every time.

Model shown: PXY875KE1E

Explore more at www.bosch-home.co.uk

PerfectCook

May your pasta never boil over again. Our hobs are designed with a sensor so you'll be able to control your cooking by the temperature in the pan rather than the power level. So whether you're defrosting, warming up, cooking or deep fat frying, you're in control with our smart **CookingSensor**. Because precise temperature control guarantees perfect cooking results.

PerfectFry

Enjoy perfectly cooked steak, however you like it. Our clever **FryingSensor** measures the temperature in the pan for perfect results. So when you're reducing a sauce, the heat will be low and gentle, and when you want a high heat for frying a bloody steak, you'll have precisely the right temperature. Say goodbye to overcooking and undercooking your favourite meals. This feature requires the purchase of a **FryingSensor** frying pan to operate. Available from www.bosch-home.co.uk/store.

More control at your fingertips.

Set the correct temperature with a single touch thanks to **DirectSelect**. No more scrolling up or down, just simply press one button to select the right heat level. Models with **DirectSelect Premium** touch controls feature an additional minimum temperature setting giving you added cooking control.

Express cooking.

Induction cooking with a turbo boost. The **Boost function** allows you to increase the power of the cooking zone by 50%* – perfect for large pots and pans or when you're in a hurry.

Easy to clean.

Automatic pan recognition only heats up the base of the pan and not the rest of the zone, which doesn't waste energy and leaves the rest of the hob cool to touch. Keeping the hob cooler makes it safer and also prevents spillages from burning on so it's easy to clean.

Clean up in an instant.

In case of any spills, simply select the **Freeze function** which freezes all the heat settings so you can thoroughly wipe and clean the hob surface. To restore the previous heat settings simply touch the button again!

Even more flexibility.

Available on selected Serie 8 FlexInduction hobs, the **Extended FlexInduction zone** offers optimum flexibility. The amount of usable surface on the hob is maximised to accommodate even the largest of cookware. With **CombiZone**, two cooking zones can be linked, making the switch from small to large pans effortless. Plus, the **MoveMode function** automatically switches from boil to simmer with a simple slide of the saucepan.

Flexible.

FlexInduction is great for roaster pans and poaching as well as large grill pans.

The perfect combination.

For the first time we are combining the best of our technologies from our induction hobs and powerful cooker hoods in a single appliance. The PerfectAir venting hob removes odours at source, leading to fewer cooking smells in the kitchen. It can be easily installed into the work surface to suit any kitchen design and has the added convenience of being easy to clean. Thanks to the PerfectFry sensor and PerfectCook sensor on the hob, you can achieve perfect results whether you're frying or boiling.

Introducing the Bosch gas hob range.

Professional performance and intuitive control matched with stylish good looks, Bosch gas hobs are available in a variety of finishes and colours. To help you choose the right gas hob for your home we have divided them into the three ranges below.

Whichever model you choose from our Serie ranges, you'll find lots of reasons to love your Bosch gas hob.

Stunning good looks and ultimate control.

Stunning good looks and ultimate control. A gas hob delivers instant heat and is easy to adjust and control, making it a favourite in many kitchens. With a wide selection of widths and finishes to choose from, a gas hob can add as much elegance as practical functionality to any kitchen.

Chef's recommendation.

The hob of choice in most professional kitchens, modern gas hobs are as stylish as they are practical. Our gas hobs come with cast iron pan supports that are either front or side mounted. With ignition built in to the controls, all it takes is one action to ignite and set the hob to the correct cooking level.

Serie 8 +++

Our **Serie 8** range of gas hobs combines convenience and truly elegant design with ultimate cooking control, meaning a truly professional performance in the kitchen.

Serie 6 ++

Expect excellent operation and timeless designs with our **Serie 6** range of hobs. You'll get premium engineering and materials so that you can always cook something a little bit special.

Serie 4 +

Featuring a range of gas hobs that are convenient and simple to operate, our **Serie 4** range maintains classic design and style.

Model shown for illustrative purposes only

Gas without the guesswork.

Model shown PPQ7A6B90

Welcome to intuitive cooking. The advanced technology built into our hobs makes cooking on gas simple and precise. Understanding how you cook means we've been able to design a FlameSelect feature that lets you fry, stew, steam and boil with confidence – without constantly checking the flame.

FlameSelect

We're taking the guesswork out of lighting and using the hob. Our innovative StepValve technology regulates the gas output precisely, so you're able to choose the size of flame. With an easy-to-use setting, all you need to do is decide which of the 9 power settings you want. At last, FlameSelect gives you the confidence to cook on gas without leaning down to check it.

Smart design

Square design pan supports don't just look good, but provide more stability for pots and pans. Cleverly designed to fit together, they are separate pieces, which make them easy to handle and clean. The elegant tempered glass base allows for a choice of surface mounting for quick and easy installation, or flush mounting.

A touch of the Orient

Powerful, dual ring wok burners are perfect for oriental cooking. They deliver a boost both in power and speed, but can also be used very effectively at lower settings when required.

Introducing the Bosch hood range.

Serie 8 +++

Advanced design standard and functionality to fit perfectly in your kitchen. With our **Serie 8** range of hoods experience automatic extraction rate control with PerfectAir sensor technology and CleanAir module. Our hoods offer high quality craftsmanship combined with cutting-edge technologies to make the kitchen a more pleasant environment.

Serie 6 ++

Ultimate convenience and tasteful design make cooker hoods within our **Serie 6** range an asset to any stylish kitchen. Electronic controls give you ease of use. Experience maximum operating convenience with DirectSelect touch controls from Bosch.

Serie 4 +

As the centre of family life, the kitchen needs to have a comfortable atmosphere free of cooking steam and disruptive noise. Our **Serie 4** range of cooker hoods are extremely quiet, easy to operate and impressive with their modern design.

Offering a blend of function and form, Bosch hoods deliver quiet, effective extraction that makes the kitchen and home a more pleasant environment. Make a bold design statement, or complement a more minimalist look. To help you choose the right hood, we have divided them into the three ranges below.

Whichever model you choose from our Serie ranges, you'll find lots of reasons to love your Bosch hood.

Why shout when you can whisper?

The motors in all of our hoods need to deliver powerful performance for maximum extraction, but that doesn't mean your home environment has to suffer. We have designed state-of-the-art motors in most hoods that generate noise levels of just 45 decibels*, which is about the same level of sound as a quiet conversation. And our quietest model delivers a library-quiet peacefulness of just 41 decibels**.

In this light, even your electricity bill looks good.

Our hood ranges incorporate energy efficient lighting that can be adjusted for bright illumination to work under, or lower illumination for ambient mood lighting in the kitchen. High-efficiency LED lights make both your kitchen and energy bill look good.

Designer looks.

Bosch has created a cooker hood design for every kitchen. From a stylish Island design, angled or curved contemporary glass to fully integrated or concealed. With a wide variety of sizes, types and finishes to choose from, it's easy to find the right cooker hood to perfectly match your kitchen.

Model shown: DII31RV60 island cube hood

* (45dB (A) re 20µPa sound pressure)
** (40dB (A) re 20µPa sound pressure)

A breath of fresh air in hood design.

Now your cooker hood can automatically control the air that you breathe. Intuitive sense technology from Bosch now makes cooking easier than ever.

PerfectAir

When you're busy cooking, the last thing you need to think about is adjusting your hood to clear any steam in the kitchen. **PerfectAir** is our advanced feature that clears the air without you having to do anything.

A sensor constantly detects the levels of odours in the air and adjusts the motor level – from light use to intensive – to ensure your kitchen air is always clean and fresh.

A breath of fresh air.

The **PerfectAir** sensor continually detects the level of odours in the air during the cooking process and automatically adjusts the power level to ensure optimum extraction performance. So there is no longer any need to manually adjust the

power levels. This means that you can concentrate on your cooking rather than worrying about whether your hood is on the right setting.

EcoSilence Drive™

Our **EcoSilence Drive™** brushless friction-free motor and energy saving LED lights reduce energy consumption by up to 80% compared to a similar five-year-old model, without compromising results.*

Designer looks.

The filter is concealed behind a stylish glass canopy or brushed steel cover with a brushed steel handle to hide grease build up, for a really sleek finish.

Fresh thinking.

Metal grease filters efficiently filter grease and other solid particles out of the extracted air – which means your kitchen will be cleaner. And our filters are even designed to be washed in the dishwasher.

DIY installation.

Our suspended ceiling hood is designed for easy installation. As it uses recirculation with charcoal filters, it doesn't require a ducting system to be in place or the ceiling to be lowered. It simply needs to be screwed in place, and thanks to a high-power extraction setting, you'll always have fantastic air quality in your kitchen.

Downdraft.

Discover our downdraft ventilation hood DDA097G59B that blends seamlessly into our built-in hob appliances. Perfect for kitchen islands or minimalist designs, it can be neatly tucked away into your worktop when not in use.

Let there be light.

Create some atmosphere in your kitchen with our **AmbientLight** feature lighting. Choose from a variety of colours and light intensities on your hood to create that all-important ambiance to compliment your cooking. Available on our Serie 8 Mondrian Hood DWF97MS70B.

Control at your fingertips.

Set the correct temperature with a single touch thanks to **DirectSelect**. It's easy to operate: simply select the right power setting and away you go.

Model shown: DWK98PR60B (hood) PXY875DE3E (hob)

*Same power setting, same extraction rate, halogen lights.

Downdraft Hood

Serie 8 +++

DDA097G59B
Downdraft hood

Specifications
Downdraft for installation in worktops
Extension height 401mm
Grease filter saturation indicator
Touch Control with electronic display
4 power levels + 1 intensive setting
LED lighting: for perfect, very energy-efficient illumination of the hob.
Automatic intensive revert (6 mins)
Runs for an extra 15 minutes
Twin channel high performance fan motor
Suitable for ducted or recirculated extraction

Performance and design perfectly matched.
Serie 8 hoods have been designed to beautifully match the other appliances in the range and contain some of our most innovative, cutting edge and user-friendly technologies.

Ceiling hoods

Serie 8 +++

DID106T50
Ceiling hood

Specifications
Easy installation
Rim ventilation
Filter saturation indicator
Remote electronic controls
3 power levels + 1 intensive setting
2 strip LEDs
Auto intensive revert (6 mins)
Softlight with dimmer function
Runs for an extra 30 minutes
Suitable for recirculated operation

Serie 8 +++

DID09T951B
Ceiling hood

Specifications
Electronic display
Remote control
3 power levels + 1 intensive setting
4 x LED lights
Softlight with dimmer function – creates ambiance
Max. extraction rate (normal): 570 m³/h
Max. extraction rate (intensive): 780 m³/h
Auto intensive revert (4 mins)
Automatic after-running – ensure no smells linger
Grease filter saturation indicator
Max. noise level: 64 dB

Island hoods

Serie 8 +++

DII31RV60
Island cube hood

Specifications
Bosch ring control
PerfectAir sensor
Home Connect
3 power levels + 2 intensive settings
4 x LED Lights
Max. extraction rate (normal): 390 m³/h
Intensive operation revert (6 mins)
Automatic after-running – ensure no smells linger
Grease and charcoal filter saturation indicators
Max. noise level: 69 dB
Recirculation only

Serie 8 +++

DIB091K50B
Island hood

Specifications
Electronic Touch Control
Rim ventilation
Filter saturation indicator
3 power levels + 1 intensive setting
4 x LED lights
Softlight with dimmer function
Auto intensive revert (6 mins)
Ducted or recirculating operation
EcoSensor

Models shown: DID106T50

Out of sight, but not out of mind.

Bosch built-in appliances are loaded with discreet technology that's designed not to be seen... or heard.

It's not just our cooking appliances which are packed full of innovative and intuitive technology designed to make life easier.

Our range of built-in washing machines, dishwashers and refrigerators include models that are low in water consumption, are energy efficient, quiet in operation and have clever features such as the TimeLight. Featured on selected dishwashers and washing machines, it takes away the guesswork on the progress of the wash. It's the clever engineering that makes our appliances more economical, efficient and stylish in the kitchen.

Washing machine **WIW28500GB**
Dishwasher **SMV68TD06G**
Freezer **GIV11AF30**
Fridge - image used for illustrative purposes only.

Introducing the Bosch laundry range.

Our built-in home laundry appliances are packed full of innovative and intuitive technology. Low in water consumption, energy efficient and quiet in operation, it's the clever engineering that makes our appliances more economical, efficient and stylish in the kitchen. To help you choose the right laundry appliance, we have divided them into the three ranges below.

Serie 8+++

Perfection in every detail, our **Serie 8** range of laundry appliances stand out from the crowd with superior quality, results and first-class design. Clever features such as the TimeLight take away the guesswork on the progress of the wash. Unique innovations combined with energy efficiency deliver outstanding performance.

Serie 6++

Our **Serie 6** range of laundry appliances offer a broad choice of specialist programmes and deliver high performance and effortless convenience to enhance your lifestyle.

Serie 4+

Models within our **Serie 4** range combine practical features and Bosch build quality in a consistent, value for money package.

Whichever model you choose from our Serie ranges, you'll find lots of reasons to love your Bosch laundry appliance.

Hand wash in the machine.
The woollens hand wash programme is so gentle that even the most delicate laundry can be conveniently washed in the machine.

Washed and dried to perfection.
Programme a wash and dry in one go. Thanks to advanced sensor drying, load the machine and you'll come back to perfectly dry clothes. The programme cleverly turns off once the sensors detect the laundry is dry, so you'll save energy and minimise the risk of any damage through over-heating.

More space.
No need to compromise on wash loads with a large 8kg capacity and a 1400rpm spin speed. These latest washing machines are extremely energy efficient maintaining an A+++ rating.

Save time. Save energy.
With VarioPerfect™ you decide.
The battle against rising average energy and water bills starts here with VarioPerfect™ technology on all our built in washing machines. Get full loads clean in just one hour* by selecting SpeedPerfect or select EcoPerfect and laundry comes out brilliantly clean using up to 66% less energy.**

* Compared to just over two and a half hours on EasyCare 40°C wash programme.
** Compared to an EU label standard cotton 60°C programme.

Model shown: WIW28500GB

Effortlessly efficient, load after load.

Our built-in laundry appliances are designed to perform perfectly, load after load. And our advanced technology means your clothes are cleaned effectively and efficiently.

Model shown: WIW28500GB

Explore more at www.bosch-home.co.uk

Never miss an item again. Reload by Bosch.

For dropped socks, mistaken items with your whites or forgotten clothes, **Reload** function on all Bosch washing machines allows you to add or remove clothing of any size to your washes. Simply pause the cycle and the machine will automatically adjust the water level to allow you to open the door. Reload your items and restart the wash.

WaveDrum™ – tough but gentle.

The unique **WaveDrum™** is designed for faster and gentler washing, while tackling tough dirt and stains. Just select the programme for your wash and the droplet-shaped drum structure and the asymmetrical paddles adjust the drum movements to powerful or gentle. The 8kg drum also protects your laundry and reduces creasing, making ironing easier.

Enjoy the quiet life.

Our latest washing machines with **EcoSilence Drive™** generate a noise level of just 41 decibels – that's quieter than the sound of the sea at 55 decibels. The modern world is noisy enough, so it's good to know that Bosch technology can help make the home environment a little oasis of calm.

Silent night.

The special **Night Wash** programme makes washing machines some of the quietest in their class. The function reduces the high spin speed during the spin cycle so you can do your washing while everyone is sleeping without disturbing your family or neighbours.

Less rock and roll.

We've also created **AntiVibration** technology to cut down noise. The sidewalls of the washing machine feature a spiral design that increases stability and reduce vibrations. Improved sound insulation and low noise shock absorbers further dampen the noise to provide a whisper quiet machine.

TimeLight.

Bosch washing machines are so quiet sometimes it's hard to tell whether they are on or off, especially on fully-integrated models where there is no visible control panel. The new TimeLight indicates the programme status and time remaining onto any floor surface.

Making **life easy** through innovative technologies

Washing machines

Ideal for families.

Ideal for families and busy households, the large 8kg capacity means you can wash more laundry in one go. A typical 8kg load could be made of king size bed linen, including 4 pillow cases. So whether you have lots of laundry, or fewer loads but with larger amounts, large capacity will make your laundry life easier.

Serie 8 +++

Washing machine
WIW28500GB

Introducing the Bosch dishwasher range.

All our built-in dishwashers offer a range of advanced technologies as standard and additional options across the range to suit your individual requirements. To help you choose the right Bosch dishwasher, we have divided them into the four ranges below.

Serie 8 +++

Our **Serie 8** range combines cutting-edge design and advanced technologies for optimum cleaning performance. The **A+++** energy efficiency rating of this range is complemented by our **PerfectDry** function where moisture is absorbed before being released as hot air for energy-efficient drying. Exceptionally quiet, offering additional storage and flexible loading solutions.

Serie 6 ++

Our **Serie 6** range comes packed with technology, from energy- and water-saving modes to quick washes for when time is at a premium. They also feature our clever **PerfectDry** function and **VarioFlex baskets** with coloured touchpoints for flexible loading solutions and accommodating the most awkward shaped dishes.

Serie 4 +

Our **Serie 4** range of models offers great value for money but does not compromise on Bosch build quality. They combine advanced energy and resource-saving features. In addition, they offer **flexible Vario** and **VarioFlex baskets** with foldable racks in the top and bottom baskets.

Serie 2

Our **Serie 2** dishwashers offer you the classic design with easy operation. They are the optimal solution for anyone who wants a reliable appliance with good value for money.

Model shown: SMV68TD06G

Whichever model you choose from our Serie ranges, you'll find lots of reasons to love your Bosch dishwasher.

Whisper quiet washing.

Bosch dishwashers are amongst the quietest in the world. With revolutionary EcoSilence Drive™ there are dishwashers in the range which operate at 39 decibels, that's even quieter than the sound of a bee buzzing! With the Silence programme selected, the noise is reduced even further.

Save water every load.

The ActiveWater™ technology in our dishwashers means it can take as little as 6.5 litres* of water to clean 13 place settings for a three-course meal**. That's less water than it takes to fill a standard-sized kitchen sink.

Energy efficiency.

The opportunity to save energy is now even better. Innovative technology in our dishwashers gets the most out of every single drop of water. Our most energy-efficient dishwashers in Serie 8 and Serie 6 ranges boast an A+++ energy rating.

Technology to save you time.

Our VarioSpeed option reduces programme times without compromising on quality. So you still get hygienically clean and dry dishes but in just 90 minutes – ideal for busy households and entertaining. Choose VarioSpeed Plus (available on selected models) and your dishes will be clean in about a third of the time.

10 year anti-rust warranty.

Our appliances are made from top quality materials and in addition to our standard appliance warranty, we provide a free of charge warranty against rusting-through of the dishwasher's inner cavity.

*6.5 litre water consumption on standard Economy 50° programme.

**Three-course meal as defined by dinner, soup and dessert plate, cup and saucer, glass, knife, fork, soup, tea and dessert spoons for each place setting as well as 1 serving plate, 2 serving bowls, 2 serving spoons, 1 serving fork and 1 sauce spoon.

Less water, less energy, more clean dishes.

Our clever built-in dishwashers include advanced features that reduce energy and water consumption and leave your dishes perfectly clean. Our PerfectDry dishwashers use energy-saving minerals that heat up when they come into contact with moisture, to create cupboard-ready results naturally using Zeolith®.

A clever function that saves energy by using less electricity to dry everything to perfection. And we do mean everything – plates, pans, glasses and all plastic items. Your lunchboxes and containers will be completely clean and perfectly dry, so you'll never have to pick up a tea towel to finish the job again. The technology behind PerfectDry, unique to Bosch, is called Zeolith® – a process applied to every cycle that uses naturally occurring minerals that heat up when they come into contact with water. The warm air is then distributed evenly over the load.

The dishdryer among dishwashers.

The technology behind **PerfectDry** uses **Zeolith®** minerals to help dry the load economically and efficiently. The dishwasher absorbs humidity from the washed dishes and the clever **Zeolith®** beads then transform that humidity into warm air that speeds up the drying process. So when you need a wash with brilliant drying results, it's time to choose Bosch.

Where every pot has its place.

Our flexible **VarioFlex Pro** basket system allows you to adjust the space inside of your dishwasher to suit exactly the items you're washing. The foldable racks adapt to any load whilst still securing everything in place.

Quick programmes.

We've created a short 60°C programme which not only cleans quickly, but

finishes with fantastic drying results. In appliances with **PerfectDry** dishwashing, **Zeolith®** minerals help dry the load economically and efficiently. So when you need a wash with brilliant drying results in just 89 minutes, it's time to choose a Bosch.

Save water every load.

It takes just **6.5 litres*** of water for our dishwashers to clean 13 place settings for a three-course meal**. That's less water than it takes to fill a standard sized kitchen sink. And as our dishwashers are also energy efficient (up to an A+++ rating on some models), they also save you money.

Take away the guess work.

Now you can see how long the programme has left to run without opening the door. Thanks to our **TimeLight** feature, on Serie 8 and Serie 6 models, the time remaining on your cycle is projected onto the floor. You can also view the programme progress

status, and with a dishwasher this quiet, you may even want to check it's still running!

Machine Care programme.

Your dishwasher will help look after itself with this smart function. Optimising the water and energy consumption, it works on a short run time of 80-90 minutes at high temperatures. It eliminates lime and grease deposits inside the tub and works with a standard machine-care detergent. On selected Serie 8 and Serie 6 models, it will even remind you to run the programme every 30 cycles.

DoorOpen Assist.

This thoughtful feature lets you open your dishwasher automatically with a gentle push on the door. With no handles, the front of the dishwasher will integrate perfectly into any modern designer kitchen while ensuring you can easily load and unload your machine.

More drying power when you need it.

Want your dishes extra dry? No problem. This function gives you even more drying power when you need it. Just choose the **Extra Dry** option and more heat will be created to extend your load's drying cycle.

Model shown: **SMV68TD06G**

*6.5 litre water consumption on standard Economy 50°C programme.

**Three-course meal as defined by dinner, soup and dessert plate, cup and saucer, glass, knife, fork, soup, tea and dessert spoons for each place setting as well as 1 serving plate, 2 serving bowls, 2 serving spoons, 1 serving fork and 1 sauce spoon.

60cm dishwashers

Finally, a dishwasher that dries as perfectly as it cleans, even on plastics. Our PerfectDry dishwashers use energy saving minerals that heat up when they come into contact with moisture, to create cupboard ready results naturally.

Model shown: SMi68MS06G

Introducing the Bosch refrigeration range.

Save more, waste less. Our range of built-in fridge freezers save you money thanks to their energy efficiency ratings. They are also packed with innovative technology to keep your food fresher for longer, so you'll throw out less and save on your weekly shopping bill. To help you choose the right appliance, we have divided them into the four ranges below.

Serie 8 +++

Cutting-edge design meets advanced technologies. All models in our **Serie 8** range are packed with energy efficient and labour saving features that save valuable time, effort and money – perfect for modern, busy households.

Serie 4 +

All models in our **Serie 4** range combine practical features with Bosch build quality.

Serie 6 ++

Our **Serie 6** range of appliances combines energy efficient performance with convenient storage and superior food preservation.

Serie 2

Built to keep electricity costs down. With energy efficiency an increasing priority in homes, the **Serie 2** refrigeration range is just as efficient as it is value for money.

Whichever model you choose from our Serie ranges, you'll find lots of reasons to love your Bosch fridge freezer.

Energy efficient.

365 days a year, 24 hours a day, fridges and freezers are always on. In fact, they make up around 17% of the electricity used in the home, or even more if it's a particularly old model.* That's why we design our fridges and freezers to be as energy efficient as possible, and we're proud to be able to offer so many right across our ranges.

NoFrost.

Never worry about having to defrost the freezer again. The NoFrost system prevents the build up of ice by automatically initiating the defrost operation as required. This also helps to maintain the appliance's energy efficiency.

LowFrost.

LowFrost cuts ice build up by half meaning you only have to defrost your freezer every 2 to 3 years, compared to approximately every 3 months for a static freezer, saving you energy and time.

SuperFreeze & SuperCool.

Activating the SuperFreeze function before you go shopping lowers the temperature for a short period, so anything new put into the freezer is frozen quickly. SuperCool on your fridge performs a similar task, keeping everything at the right storage temperature.

Freezer GIV11AF30.
Fridge – image used for illustrative purposes only.

Lock in the freshness.

Flexible to fit your kitchen, our refrigeration options let you decide your own fridge and freezer capacity. And smart technology keeps your food as fresh as possible for as long as possible.

Perfect pairs.

You can now personalise your fridge and freezer to suit your kitchen perfectly. Thanks to our clever design, you can purchase single door fridges and freezers to be combined to give you just the right capacity.

Your perfect combination.

In addition to side-by-side installation, it is also possible to install our fridges above the freezers, therefore using up less room in the kitchen, and making it possible to choose a larger fridge capacity than a standard fridge-freezer would allow. There are two different kinds of hinges: a sliding hinge that allows the hinged furniture door to be mounted at the kitchen cabinet body, while with a fixed hinge the furniture door can be mounted at the appliance door. While sliding hinges are great value, easy to install and unaffected by the weight of the door, fixed hinges can be soft closing giving easy access to the appliance's interior. If you're replacing an appliance, always ensure that you choose a model with the same type of hinge*.

*See full details for over/under combinations in the Product Specification section at the back of the brochure.

Save time with flexible storage.

Put away the weekly shop more easily, and get what you need faster too, thanks to height adjustable shelves and fully extendable drawers. The **EasyLift door shelf** can be raised to make space for taller items to be stored in the door. The **EasyAccess shelf** can be conveniently extended so you can more easily view the food in your fridge.

More space.

Our freezers are extra spacious meaning you will find it easy to fit everything in – perfect for busy households. The extra large **BigBox** is big enough for large bulky items.

Quietly does it.

As there could be many small and larger hands opening and shutting the fridge door, it's nice to know that we've integrated **SoftClosing doors** in many models – so doors do not get accidentally left open.

0°C – the perfect temperature.

With **VitaFresh**, you'll be able to store your fruit and vegetables at exactly 0°C to lock in the freshness. And with an adjustable humidity setting on the drawer, you'll be keeping your fresh food in a perfectly controlled environment.

You'll also find two drawers, one for fish and one for meat, with a temperature regulating slider which lets you lower the temperature up to 4°C lower than the rest of the fridge. **VitaFresh plus** models have the added benefit of a convenient push button for humidity control.

Another job off the list.

Never worry about defrosting the freezer again. The NoFrost system prevents the build up of ice by automatically initiating the defrost operation only when it's needed, also helping to maintain energy efficiency.

2017

Installation tips

Ovens, microwaves and hobs	
Flexibility to choose the way you want to cook Whether you're creating a feast for fifteen, steaming a healthy meal, cooking for one or popping on a frozen meal, Bosch appliances have the flexibility to do the job.	
Built-in single and double ovens The beauty of built-in ovens is that they can be housed in a variety of positions. For optimum convenience, install in standard tall cabinets at a level to suit the main users. Install single ovens alone, or together with a combination oven/microwave, built-in microwave, steam or combination steam oven. Hobs need to be bought separately.	
Built-under single and double ovens Single ovens can also be installed under the work surface, directly below the hob, or apart from it. Bosch also offers double ovens that are specifically designed for installation under the work surface. Hobs need to be bought separately.	
Compact steam, combination ovens and combination microwave ovens Compact appliances offer a range of combination or specialist functions – for example steam cooking is one of the healthiest methods of cooking available – and are ideal if space is at a premium. If you have more room, they're perfect for providing extra capacity and flexibility above or alongside a suitable built-in single oven. Build in to a standard tall or base cabinet with or without a warming drawer.	
Standard built-in microwaves Depending on the model, you can install into a tall housing, or in a wall cupboard. Wall cupboard models are available in 50cm or 60cm widths, and all come with installation/trim kit.	
Hobs Choose from gas, induction, ceramic or sealed plate. Available in 6 widths: 30, 60, 70, 75, 80 or 90cm.	

Quick checklist		
Ovens ■ Standard single oven ■ Double oven ■ Built-under ■ Built-in at eye level	Built-in ■ Built-under ■ Built-in wall cupboard installation ■ 50cm wide ■ 60cm wide	Hobs ■ Gas ■ Induction ■ Ceramic ■ Sealed plate ■ 30cm wide ■ 60cm wide ■ 70cm wide ■ 75cm wide ■ 80cm wide ■ 90cm wide

Steam oven/combination oven/combination microwave ■ Steam combination oven ■ Steamer ■ Combination oven ■ Combination microwave		

Installation tips

Hoods	
Keep air fresh and free of cooking smells Extractor hoods are an integral part of a clean and fresh working kitchen environment. Not only do Bosch extractor hoods look good and add a professional touch to your kitchen, they also deal quietly and efficiently with the key tasks of eliminating unwanted odours and removing grease and moisture from the kitchen.	
Chimney extractor hoods Choose between wall-mounted models or an island version to create a striking focal point in the kitchen. Some models are further enhanced by glass canopies. Available 60, 70 and 90cm wide.	
Chimney extractor easy mounting system Installing your new cooker hood in the kitchen is quick and straightforward with the patented easy mounting system. The self-levelling fixing rings allow you to precision adjust the horizontal position of the hood by up to a 6mm radius.	
Slimline extractor Ideal where an unobtrusive extractor is required. Built into a wall cabinet above the hob, it can be extended when in use, and retracted when not. Use the special handle profile accessory, or if you prefer, a matching pelmet from your kitchen supplier. 60 or 90cm wide.	
Conventional extractor hoods Ideal where space is at a premium, these 14cm tall extractors can be mounted directly to the wall or suspended beneath a reduced height wall cupboard. 60cm wide.	
Integrated extractor hoods Integrated extractor hoods are designed to be mounted between two cabinets with a matching furniture door affixed to the front.	
Canopy extractor hoods Designed to fit discreetly into the base of a wall cupboard, or specially designed furniture canopy with operation from below. 60cm wide.	
Choosing the correct extractor As a guideline, the air in the room should be changed 6-12 times per hour. Calculate the floor area in square metres and multiply by the height of the room in metres. Then divide the maximum extraction rate (not freeblowing) of the hood selected by the figure calculated above. The resulting figure should be at least 7, but preferably as close to 12 as possible.	
Example Kitchen (H x W x D) metres 2.1 x 4.5 x 4.2 = 39.7m³. Assume 10 air changes per hour – multiply 39.7m³/h by 10 = 397m³/h. Choose a hood capable of extracting at least this amount of air per hour – e.g. DWB097A50B (max ducted extraction rate 460m³ per hour).	
To avoid excessive noise, try to select a model which meets the above requirements on an intermediate speed, rather than at the highest speed.

Ducted or recirculation mode?

Ducted extraction

Ducting out is the most effective method of extraction if the hood can be sited on an outside wall, or an outside wall can be reached via ducting. The main difference between ducted and recirculation cooker hoods is that ducted systems can extract steam and odours, as well as grease. All our extractors are now standardized to a 150mm diameter outlet for easier installation. Use of 120/125mm diameter ducting is also possible, but will result in reduced air flow and increased noise. Use of 100mm diameter ducting is not recommended.

The following points should be observed for optimum ducted extraction results:

- 1. Ensure any pipe elbow bends are at least 30cm from the hood ducting opening.
- 2. Avoid reducing the diameter or area of the ducting.
- 3. Use wide-angled pipe elbows, but keep the number used to a minimum.
- 4. Only install pipes with smooth, even inner surfaces. If a flexible hose has to be used, ensure it is pulled tight to smooth out the ridges before fixing.
- 5. Avoid reducing the diameter or area of the ducting.
- 6. Use ducting pipes with a diameter of at least 120mm, but ideally 150mm.
- 7. Keep piping to a minimum – use the most direct route to external outlet.
- 8. Make sure that there is an adequate supply of fresh air to replace the air ducted out of the kitchen i.e. windows that can be opened, doors to adjacent rooms, air bricks.

Problems with installation may occur if points 1 to 8 are not observed.

Recirculation kit

Cooker hoods with recirculation are energy-efficient and much easier to install. Air is passed through the metal filter to extract the grease and then through a special charcoal filter, which removes odours. The purified air is then returned to the room. As no ducting openings are necessary, this is an energy efficient method of extraction as no energy can escape (ie. cool air in the summer or warm air in the winter), making it a good choice for low energy houses. The kit contains all you need to set the hood up for recirculation and installation is relatively easy. Check each model for details on the appropriate recirculation kit accessory.

- Tips and hints**
- 1. Calculate the extraction capacity needed.
 - 2. Choose a hood with at least the same width of your hob.
 - 3. Ensure efficient pipe ducting installation.
 - 4. The hood should be installed at a minimum of 65cm above a gas hob or 55cm above an electric hob.
 - 5. To effectively remove cooking odours from your kitchen, switch the hood on 5-10 minutes prior to cooking.
 - 6. Leave the hood to run at a low setting after cooking has finished for 5-10 minutes to remove any lingering odours. Or simply select the Automatic After Running function, which enables the hood to continue running at a low speed for 10 minutes before automatically turning itself off (available on selected models).
 - 7. Regularly clean metal grease filters to ensure optimum extraction performance. All of our metal grease filters, brushed steel filters and rim ventilation filters are dishwasher-proof.

Installation tips

Integrated cooling

Individual, versatile and low on energy consumption
Bosch's range of fridges and freezers is as varied as today's lifestyle. With an impressive range of features and models on offer, there is something to suit everyone's shopping and cooking habits.

Built-in fridges and freezers, integrated
These models are designed to be built into standard cabinets. Door panels matching your kitchen cabinets are bolted to the appliance doors so that they blend in perfectly. Please ensure that recess height is correct. Door panels and cabinets should be obtained from your kitchen cabinet supplier.

Built-under fridges and freezers, integrated
These models can be built under a continuous worktop between two cabinets, or at the end of a row of cabinets. A furniture door blends your appliance with the rest of your kitchen.

Recess dimensions
Built-under models permit variable plinth heights and are therefore suitable for different worktop heights. Dimensions (H x W): 100 x 600mm, 820 x 600mm, 870 x 600mm. Ventilation is through the plinth, no worktop cutting required.

Hinge systems
Fixed hinges
This innovative easy-to-fit hinge system requires no extra drilling and permanently secures the appliance door to the furniture door. Offers a generous opening angle of 115° and features automatic door closing at an angle of less than 20°. Some models feature SoftClose doors, a damping system that means you can push your door to and it will close silently without a 'clunk', and it will never swing back open.

Fixed hinge system

Sliding hinges
A sliding hinge, attached to a slide connector is pre-fitted in the factory, this allows the appliance door to be coupled with the furniture door. It offers adjustment in depth and height for precise fitting.

Sliding hinge system

Integrated and semi-integrated dishwashers

Fully integrated dishwashers

These models can be built under a worktop or sink drainer, between two units or at the end of a run of units. A furniture door is mounted on the appliance door so that the dishwasher is indistinguishable from other kitchen cabinets. Choose from full size 60cm wide, or slimline 45cm wide.

Semi-integrated dishwashers

A furniture door is mounted on the appliance door, so all that is seen of the dishwasher itself is the stylish control panel. Can be built under a worktop or sink drainer, between two units or at the end of a run of units. Available full size 60cm wide.

Built-in dimensions (60m wide)

If you have a recess height of 81.5 – 87.5cm, plan for an 81cm dishwasher. The appliance feet may be screwed out to a total height of 87.5cm. Or, if you have a recess height of 86.5 – 92.5cm plan for an 86cm dishwasher. The appliance feet screw out to a total height of 92.5cm.

Quick checklist

Type

Fully integrated dishwasher

- 60cm wide
- 45cm wide

Semi-integrated dishwasher (60cm wide)

- 81cm high
- 86cm high

● = Yes - = No										

¹ Air flow and noise declarations made in line with CECEC Code of Conduct.

² Measured according to EN61591 on largest pipe diameter.

³ Sound pressure measured according to EN60704-2-13 on largest pipe diameter.

⁴ Sound power measured according to EN60704-3 on largest pipe diameter.

All models comply with COMMISSION REGULATION (EC) No 1275/2008 with regard to ecodesign requirements for standby and off mode electric power consumption.

● = Yes - = No
¹ Air flow and noise declarations made in line with CECEC Code of Conduct.
² Measured according to EN61591 on largest pipe diameter.
³ Sound pressure measured according to EN60704-2-13 on largest pipe diameter.
⁴ Sound power measured according to EN60704-3 on largest pipe diameter.
All models comply with COMMISSION REGULATION (EC) No 1275/2008 with regard to ecodesign requirements for standby and off mode electric power consumption.

The side panel of the freezer is heated slightly for a side-by-side arrangement. This prevents the formation of condensation when the appliances are placed together. Therefore, always place the freezer on the left side for a side-by-side arrangement.

● = Yes - = No

¹ Based on 280 standard cleaning cycles using cold water fill, including consumption of the standby mode.

² The consumption per cleaning cycle of the "Eco 50" programme using cold water fill.

For full specification details, please log onto our website and download a full specification sheet.

All models comply with COMMISSION REGULATION (EC) No 1275/2008 with regard to ecodesign requirements for standby and off mode electric power consumption.

All diagram measurments are in millimetres (mm)

We try to keep up to date with constant technological improvements, so from time to time we may update installation guidelines. Therefore we strongly recommend that you download the latest installation guidelines from www.bosch-home.co.uk. Line drawings are for guidance only, and we recommend that you refer to the latest installation guidelines. Though every care is taken to ensure instructions are correct at the time of printing, Bosch cannot accept responsibility for incorrect planning or installation as a result of the use of these line drawings.
